

APIB Launches New License Roster Services

The APIB is pleased to provide a new on-line license roster with additional services. Specifically, the license roster now offers a search feature and is live. Now, any change to a license name, number, or status is reflected in real time. No more possible 24-48 hour delays in updates being posted through the typical process for the State. The moment the APIB office enters information into our new database that affects the name, number, issue/expiration dates, disciplinary action, or license status the on-line roster will show this information immediately. This new license roster also provides a search feature. Searches can be done by license number, first name, or last name. Both expired and active licenses are available for search.

With these new services, cyber-security features are required by the State of Alabama. Therefore, you will be asked to enter the verification code from your screen. We have selected the security feature most user friendly from the options available to us. We hope our licensees will utilize these new roster services especially in the quick confirmation of receipt of renewal or name change documents mailed to the APIB office.

The license roster is available at www.apib.alabama.gov or directly at the following link:
